| 6. | west | 16. | weather |
| 7. | Catanduanes | 17. | T |
| 8. | Pag-asa | 18. | not always |
| 9. | scientific | | |
| 10. | T | | |

1. Weather is the day to day condition in our environment. It tells whether the day is hot or cold, wet or dry, sunny or overcast.
Climate is the weather experienced for a longer period or for a year.
2. Typhoon is violent storm of wind and rain.
Flood is the overflow of water usually brought about by heavy rains.
3. The strong wind in typhoon can cause trees to be uprooted and fly to houses.
4. Topography is the specific elevation of a place, whether lower or higher.
5. temperature and elevation of a place
6. Dry season is advantageous to tourism because of our beaches.
Dry season is disadvantageous because it can dry and crack the land. And it sometimes dries the dams that supplies water to cities.
7. Wet season is advantageous because it irrigates farm lands and replenishes water supply in dams.
Wet season is disadvantageous because too much of it can flood dry land.
